Jersey, New York City Department of Health and Mental Hygiene,
NYU School of Medicine

*This activity is supported by an educational grant from the Centers for Disease Control
and Prevention, Division of Tuberculosis Elimination*

The Global Tuberculosis Institute is the tuberculosis Regional Training and Medical
Consultation Center for the northeast United States

COURSE DESCRIPTION & OVERALL GOAL

In commemoration of World TB Day, this conference will address TB prevention and control efforts in New York City to highlight progress in the fight against TB. Topics will include a review of local epidemiology, new diagnostic and treatment recommendations, and strategies for patient-centered care, and TB elimination.

WHO SHOULD ATTEND

This conference is open to physicians, nurses, epidemiologists and other health care workers who manage patients at risk for or diagnosed with TB infection or disease.

WHY COURSE IS NEEDED

Management of TB requires a multidisciplinary approach which relies on knowledge of local epidemiology, populations at risk and successful interventions. This conference will provide updates in management of TB and prevention and management practices. It will also promote networking among colleagues, resource sharing and collaborations with partnering agencies.

OBJECTIVES

Upon completion of this conference, participants should be better able to:

- Describe the epidemiology of tuberculosis in New York City to make informed decisions about outreach interventions and allocation of resources;
- Apply current guidelines for assessing risk, testing and treating TB infection to prevent development of disease;
- Discuss patient-centered care approaches for addressing the challenges of managing patients with complex clinical and social issues; and
- Apply current approaches for the diagnosis, treatment and management of routine and complex TB cases

New York City Department of
Health & Mental Hygiene,
Long Island City, NY

Joseph Burzynski, MD, MPH
Assistant Commissioner
Director, Bureau of Tuberculosis Control

PLANNING COMMITTEE

ACTIVITY DIRECTOR

Global Tuberculosis Institute
Newark, NJ
