This activity is supported in part by an educational grant from the Centers for Disease Control and Prevention, Division of Tuberculosis Elimination

The New Jersey Medical School Global Tuberculosis Institute is the Tuberculosis Regional Training and Medical Consultation Center for the Northeastern United States

COURSE DESCRIPTION & OVERALL GOAL

In commemoration of World TB Day, this conference will address TB prevention and control efforts in New York City to highlight progress in the fight against TB. Topics will include a review of the local epidemiology, taking steps to address TB among the foreign born, new treatment options for latent TB infection, laboratory testing for TB, working with prison populations, and managing TB and co-morbidities. Case studies and question and answer sessions will be included to enhance discussions as well as to share experiences.

WHO SHOULD ATTEND

This conference is open to providers (pulmonary, infectious disease, community health, infection control) and health care workers who manage patients at risk for or diagnosed with TB.

WHY COURSE IS NEEDED

The management of TB requires a multidisciplinary approach which relies on knowledge of the most current information of TB rates, populations at risk and interventions that are successful. This conference will provide a forum for learning this information as well as for discussion among colleagues.

OBJECTIVES

Upon completion of this conference, participants will be able to:

- Apply current recommendations for the treatment of latent TB infection to improve treatment outcomes
- Describe the available laboratory testing for the diagnosis of TB and monitoring patient response to therapy
- Describe the rationale, methods, and implementation of needs assessment conducted as part of the New York City *Foreign-Born Initiative*
