This activity is supported in part by an educational grant from the Centers for Disease Control
and Prevention, Division of Tuberculosis Elimination

The New Jersey Medical School Global Tuberculosis Institute is the tuberculosis Regional
Training and Medical Consultation Center for the northeastern United States

COURSE DESCRIPTION & OVERALL GOAL

The purpose of this training is to strengthen providers' knowledge of tuberculosis
and health communication strategies. This training utilizes lectures, discussions,
and interactive breakout sessions.

WHO SHOULD ATTEND

This training is designed for nurses, community health workers, physicians, and
public health professionals.

WHY COURSE IS NEEDED

As the incidence of tuberculosis continues to decline, maintaining clinical and
public health expertise in TB is particularly challenging. This training aims to build
the TB knowledge base of clinical and public health staff to facilitate appropriate
risk assessment, testing, and treatment of TB.

OBJECTIVES

Upon completion of this course, participants should be able to:

• Apply current recommendations for the risk assessment, diagnosis, and
treatment of TB in order to effectively treat latent TB infection
• Integrate health communication strategies to ensure patients understand
their diagnosis and treatment plan
• Utilize strategies for finding quality health information in order to guide
patients to appropriate resources
• Define health literacy in the context of TB programs in order to engage TB
patients in a sensitive, accessible manner
Assess patient attitudes and beliefs towards latent TB infection with the aim of improving communication and treatment completion

COURSE REQUIREMENTS

In order to meet the learning objectives and receive continuing education credits, participants are required to attend the entire conference and complete an evaluation. A post-course follow up evaluation will be sent to participants within 2 months of the conference.
